## Green Funerals and Environmentally Friendly Options

Essentials is one of a select number of funeral establishments who meet the criteria for providing green funeral services by the Green Burial Council; a tax-exempt, non-profit organization working to encourage environmental sustainability in the field of funeral service.

Our services and merchandise provide options that allows for a funeral to take place, without the use of toxic or non-biodegradable materials/chemicals. Environmentally friendly caskets and shrouds are made available to respectfully transport the deceased to their final place of rest.

Preparation of the deceased, which is suitable for a green funeral service, accommodated by Essentials, consists of (and not limited to), an appropriately cooled atmosphere within our care suite, refrigeration, and the use of topical sprays (non-chemical).

Home wakes, public visitations, church funerals and graveside services are options that may be arranged within an appropriate time frame that a green funeral allows. Please don't hesitate to ask or review our pricelist, for detailed information regarding our services and merchandise selections.

“Going green is not only a choice and a way of living, it's a beautiful legacy and a way we can care for our planet after our death.” – Krystal Riddell, Managing Funeral Director/Owner
